## Servicing and Aftercare

It is important to keep your equipment clean and heads greased in line with the operating instructions supplied with your equipment. Servicing is also an essential part of the aftercare required to ensure that it continues to function effectively and efficiently. Servicing should at least be an annual event but for those practitioners treating 1000 - 2000 equines a year your dental power tool system (DPTS) will need servicing twice in a year. Regular servicing will, over time, reduce your long term operating costs and the options are:

### DYNAMIC EQUIPMENT SERVICE CENTRES

Dynamic has invested heavily in training in the UK and overseas of technicians working within their distribution network with a view to achieving a consistent level of service and repair no matter where you, the customer, live. FOR LOCAL SERVICE AND DISTRIBUTORS SCAN THE QR CODE.

Available with Titanium Nitride coating to reduce chipping and increase blade lifespan.
*Also available without backing plate for slimline float handles*

### Triangular Inserts

***Rotate for a fresh razor sharp blade***

Triangular inserts (X-files) have three sides and stack together to create three cutting surfaces. The three/four groove pattern is designed to hold a steady line while working on the arcades.
These super strong inserts are made from Tungsten Carbide and are designed to be long lasting. The Titanium Nitride coated option increases durability.
